

# GAS HEAT PUMPS ARE AN ENERGY-EFFICIENT HEATING SOLUTION FOR HOME AND BUSINESS

Gas heat pumps are an innovative technology that can replace your boiler or furnace. They provide a reliable heating source for your home or building. They are ideal for our Midwest cold winters, offering reliable heating down to minus 40 degrees Fahrenheit without needing backup heat.

## GAS HEAT PUMP BENEFITS

### Highly efficient

Achieve efficiencies up to 140% by harnessing the power of outdoor air and natural gas.

### Money-saving

Reduce your heating bills.

### Environmentally friendly

Reduce a building's CO<sub>2</sub> emissions.
